

**2020 ADMINISTRATIVE PERMIT CONDITIONS**  
**TREE TRIMMING**

By submitting a signed permit application, permittee accepts and agrees to comply with all terms and conditions, including those appearing on the permit application, these administrative permit conditions, the standard conditions, and all special permit-specific conditions.

Permittee is responsible for compliance with all conditions of the permit, regardless of whether permittee employs contractors or others to perform the work.

Failure to comply with any condition of the permit, including work contrary to any condition of the permit, constitutes a misdemeanor violation of Ventura County Ordinance 4540 ([EO 4540](#)) approved by the Board of Supervisors on March 19, 2019.

**EMERGENCY WORK:**

Emergency work requires an immediate phone notification to the Permits Section at (805) 654-2055. In addition, an application for the emergency work must be submitted no later than 5:00 p.m. the next business day.

**SEPARATE INDIVIDUAL PERMIT REQUIRED:**

A separate individual permit is required when ANY of the following are true:

- (1) Major trimming or removal of any tree in the county-maintained road right-of-way.
  - (a) Major trimming is defined in the Resource Management Agency (RMA) Planning Division Tree Permits and the Tree Protection Ordinance webpage at <https://vcrma.org/tree-permits-and-the-tree-protection-ordinance/>. Arborist verification forms and reports may be required.
  - (b) Major pruning involves pruning limbs or roots that are greater than 20 percent of the tree's girth or pruning that overall will amount to more than 20 percent of the trees canopy or root system.
  
- (2) Major trimming or pruning of branches or limbs in the county-maintained road right-of-way for any tree whose trunk is located partially or primarily on private property.
  - (a) Ministerial permits may be required from the RMA as described here above.
  - (b) The private property owner should apply for the permit. The administrative permit holder may apply for the permit on behalf of the property owner.
  - (c) A copy of the ministerial permit must be provided to the PWATD before the PWATD will issue a separate individual permit.
  
- (3) Work duration at any one location is more than eight (8) hours.
  
- (4) Location of work and traffic conditions do not meet Scenario #1 or Scenario #2 below.

If any of these are true, then the work to be performed requires a separate individual permit and would not be covered solely under the Administrative Permit ([Apply for Permits](#)). For application requirements for a separate individual permit, please read Requirements for Application Submittal here below. Permit applications may be found at: <http://vcpubliworks.org/transportation-department/road-encroachment-permit>.

For minor trimming work, no permit is required; however, major trimming or any tree removals as described here above require a permit.

**SEPARATE INDIVIDUAL PERMIT NOT REQUIRED:**

A separate individual permit is NOT required for minor trimming or pruning or maintenance when all of the following conditions are true:

- (1) Minor trimming of tree(s) in the county-maintained road right-of-way.
  - (a) Minor trimming is defined in the Resource Management Agency (RMA) Planning Division Tree Permits and the Tree Protection Ordinance webpage at <https://vcrma.org/tree-permits-and-the-tree-protection-ordinance/>.
  - (b) Minor trimming is NOT major trimming. Minor pruning would involve limbs or roots that are less than 20 percent as defined here above.
- (2) Minor trimming of any tree not designated as protected or historical or heritage as defined by the County's Tree Protection Ordinance.
- (3) Work duration is less than eight (8) hours.
- (4) Speed limit and traffic control conditions for the work meet one of the following scenarios (all items must be met).
  - (a) Scenario #1:
    - Speed limit is 25 mph or less posted/observed;
    - Traffic control is limited to shoulder work (TA-3), shoulder work with minor encroachment (TA-6), or flagging operation (TA-10);
    - Work zone is no longer than 100 feet.
  - (b) Scenario #2:
    - Speed limit is greater than 25 mph posted/observed;
    - Traffic control is limited to shoulder work (TA-3) (e.g. working only on shoulders, no flagging operation, no traffic delays, no work in traveled way or bicycle lane).
    - Work zone is no longer than 100 feet.

Questions regarding the separate individual permit may be addressed to the Permits Section. A decision regarding the need for a permit will be made on a case-by-case basis.

Inspector Notification

When a separate individual permit is NOT required, the permittee is still required to notify the Inspector 48 hours or two (2) business days in advance, whichever is greater. The permittee must speak with the Inspector prior to commencing the work. The Inspector may require additional traffic control measures for the work.

## **WORKING WITHOUT A SEPARATE INDIVIDUAL PERMIT:**

The following circumstances will result in issuance of a permit and placement of charges directly onto the permittee's billing account without notice. Any such work will be charged double fees in accordance with EO 4540 and the most current approved fee schedule.

- (1) Any work started, in progress, or completed without a separate individual permit for the specific location when a separate individual permit would have been required.
- (2) Any emergency work completed without proper phone notification and subsequent application submittal.

## **AUTOMATIC EXTENSIONS:**

Any valid permit that has expired with work not completed will be automatically extended ninety (90) days by the County with an extension fee applied to the permittee's billing account.

When an application for an extension is filed prior to the permit expiration date, one extension of reasonable duration may be granted at no charge ([Apply for Permits](#)).

## **REQUIREMENTS FOR APPLICATION SUBMITTAL:**

The following items are required for the application submittal to be considered a complete application ([Apply for Permits](#)). Incomplete applications may result in a delay of one or more working days or longer in issuing the permit.

- (1) Exact location and description of the work.
- (2) Road name and distance from the nearest intersection or mile marker. Provide the situs address, if known.
- (3) Size of the tree (height, girth, width of tree canopy, etc.).
- (4) Location or layout of the tree in the road right-of-way.
  - (a) The applicant must provide a sketch or describe the location of the tree and whether the tree is located in the pavement, shoulder, or sidewalk.
  - (b) The applicant must provide distances or dimensions from the tree to visible features nearby.
  - (c) When items (a) and (b) are missing from the application, the application may be deemed incomplete.
- (5) Estimated start date and completion date of the work. Precise dates are not required, however a better estimate of the construction timeline will assist inspectors in inspecting the work.
- (6) Anticipated traffic control required for the work.
  - (a) Any work in the right-of-way of a county-maintained roadway requires traffic control.
  - (b) The applicant may propose a standard traffic control plan (TCP) or provide a site-specific traffic control plan.
  - (c) The TCP must be completed by a traffic control professional in accordance with the CAMUTCD.
  - (d) Any work conducted without traffic control is considered a violation of the permit and Ordinance.

- (7) Contact information for the applicant/permittee, contractor, and/or field contact. An email address and phone number is required. The facility owner will be designated as the permittee. Any contractor working on behalf of a permittee must provide an agent authorization.
- (8) Signature on the application or agent authorization. A signature from the applicant/permittee is required on the application or agent authorization. An agent authorization may be effective for one calendar year or as specified by the applicant/permittee.
- (9) Submit the complete application. The preferred method of submittal is through email. The application may be emailed to [pwa.transpermits@ventura.org](mailto:pwa.transpermits@ventura.org).

Other methods of submittal include: facsimile to (805) 654-5169; mail to Transportation Department – Permits Section at 800 South Victoria Ave, Ventura, CA 93009-1620; in-person at PWATD front counter.

- (10) Payment of fees. The permit fee may include the review fee, engineering review fee, and inspection fee, or a deposit for additional inspection time. The PWATD will issue the permit after all current applicable fees have been paid. For permittees with billing accounts, the permit will be emailed to the permittee or designee without pre-payment. The appropriate fee(s) will be billed to the permit and invoiced monthly.

#### **REQUIREMENTS FOR ALL TYPES OF WORK:**

- (1) Permittee with administrative permit for excavations must comply with the following standards and conditions:
  - 2020 Encroachment Permit Standard Conditions
  - NPDES Requirements
  - Conditions of Approval or attachments with any separate individual permit
  - These administrative permit conditions
  - Any special conditions
- (2) Permittee must obtain approval to start work from the Inspector a minimum of forty-eight (48) hours or two (2) working days, whichever is longer, in advance of the proposed start time.
- (3) The shapeliness of the tree must be preserved when trimming.
- (4) Permittee must provide hard-copy of permit to Inspector upon request, including any permit attachments, standard conditions, or special conditions. Permittee's work crews, contractors, or agents working in the road right-of-way must retain a hard-copy of the permit in the field at all times.
- (5) The permittee must continue to maintain liability insurance in accordance with the County requirements at all times during the permit period.
