 - Jeff Pratt held discussion on process for: We need to perform a Technical Analysis to the extent that we have a net plus to the basin. Recommend to the Board what allocation we would be given rights to pump. You will be making a public policy argument about what you have done to enhance the basin. To the extent, if we can convince the board that you have done that. You should be given the allocation that will be determined by those Partners in the Project. You may want to ask GMA to be a partner in project. To the extent that GMA participated. The allocation that they provide would be the general benefit of the basin.

Joe has had conversations with Calleguas being a partner. Next steps Technical Analysis and Staffing plan; We need physical solutions in Phase III. Storm water diversion project, Arundo removal. Enhancements, storage, increase stream flow diversions. Core issue comes to allocation of staff. Preliminary plan to move some of the staff. We have put a lot of effort into the project.
