AUGUST 2022

TO: All persons interested in Map Preparation in Ventura County

SUBJECT: Guide for the Preparation of Tract Maps, Parcel Maps,
Records of Survey and Corner Records

This manual has been prepared as an update of the outdated Ventura County *Guide for the Preparation of Tract Maps, Parcel Maps, Records of Survey and Corner Records*.

This manual reflects published data as of **August 2022**. This manual is meant to reflect the current Subdivision Map Act and Ventura County Subdivision Ordinance relating to requirements for the preparation of Tract and Parcel Maps as well as changes in the Professional Land Surveyors' Act and Board Rules relating to Records of Survey and Corner Records.

This manual may be downloaded from the County Surveyor's website at

<https://www.vcpublishworks.org/es/countysurveyor/#1531327732511-67fd141c-b203>

This office will make updates to this manual on an ongoing basis and maintain it at this link. However, names should be verified with the agency prior to signature.

Sincerely,

Daniel J. Walsh
County Surveyor

SECTION 6: OMISSION OF SIGNATURE STATEMENTS

TRACT MAPS AND PARCEL MAPS WITH FIVE OR MORE PARCELS AND/OR DEDICATIONS REQUIRED

Section 66436 of the Subdivision Map Act requires a statement, signed and acknowledged by all parties having any record title interest in the real property subdivided by Tract Maps, Parcel Maps containing five or more parcels or Parcel Maps offering dedications on the map. The following three exceptions to this requirement are permitted if the names and the nature of their interests are stated on the map, and the procedures of said section are followed:

1. Rights-of-way, easements, or other interests which cannot ripen into a fee, except those owned by a public entity, public utility, or subsidiary of a public utility for conveyance to the public utility for rights-of-way. If, however, the legislative body or advisory agency determines that division and development of the property in the manner set forth on the approved or conditionally approved tentative map will not unreasonably interfere with the free and complete exercise of the public entity or public utility right-of-way or easement, the signature of the public entity or public utility may be omitted.

Place the following note on the title sheet:

The signature of _____, present owner of an easement for _____, as disclosed by deed recorded (date) as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66436(a)(3)(A) of the Subdivision Map Act, their interest is such that it cannot ripen into a fee title and said signature is not required by the governing body.

2. Rights-of-way, easements, or reversions, which by reason of changed conditions, long disuse, or laches appear to be no longer of practical use or value and signatures are impossible or impractical to obtain. A statement of the circumstances preventing the procurement of the signatures shall also be stated on the map.

Place the following note on the title sheet:

SECTION 6: OMISSION OF SIGNATURE STATEMENTS

The signature of _____, present owner of an easement for _____, as disclosed by deed recorded (*date*) as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66436(a)(3)(B) of the Subdivision Map Act, since by reason of changed conditions, long disuse, or laches said interest appears to be no longer of practical use or value and signature is impossible or impractical to obtain because _____.

3. Interests in, or rights to, minerals, including but not limited to, oil, gas, or other hydrocarbon substances.

Place the following note on the title sheet:

The signature of _____, owner of _____ (*nature of interest*) _____, as disclosed by deed recorded [date] as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66436(a)(3)(C) of the Subdivision Map Act.

SECTION 6: OMISSION OF SIGNATURE STATEMENTS

PARCEL MAPS WITH FOUR OR FEWER PARCELS AND NO DEDICATIONS REQUIRED

For Parcel Maps with four or fewer parcels, where dedications or offers of dedication are not being made on the map, the following procedures should be used:

1. The signatures of lessees, trustees, or beneficiaries under deeds of trust, public entities or public utilities who are easement owners are omitted pursuant to Section 66445(e) of the Subdivision Map Act.

Place the following note on the title sheet:

The signature of _____, present owner of an easement for _____ as disclosed by deed (or trustee under deed of trust) recorded [date] as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66445(e) of the Subdivision Map Act.

2. The signatures of private easement owners are omitted pursuant to Section 66436(a)(3)(A) of the Subdivision Map Act.

Place the following note on the title sheet:

The signature of _____, present owner of an easement for _____ as disclosed by deed recorded (date) as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66436(a)(3)(A) of the Subdivision Map Act.

3. The signatures of mineral rights owners are omitted pursuant to Section 66436(a)(3)(C) of the Subdivision Map Act.

Place the following note on the title sheet:

The signature of _____, owner of _____ (*nature of interest*) _____, as disclosed by deed recorded [date] as Document No. _____ (or in Book _____, Page _____) of Official Records of Ventura County, has been omitted under the provisions of Section 66436(a)(3)(C) of the Subdivision Map Act.

SECTION 7: RECORDS OF SURVEY/CORNER RECORDS

WHEN TO FILE A RECORD OF SURVEY

Every survey relating to land boundaries or property lines by a professional land surveyor using existing township plats or notes, subdivision maps, official maps, or records of survey that discloses any one of the following must be documented by a record of survey:

Material discrepancies with the data contained on a map of record concerning the position of points, lines, or dimensions.

Evidence that might result in materially alternate positions for property lines or points.

The establishment of the location of points or lines not ascertainable from an inspection of the data shown on a map of record.

Material evidence or physical change is found which does not appear on the existing maps or notes.

A point or line set or established on the ground for a parcel described in a property description contained in any deed or other instrument of title that is not shown on a map of record.

Exemptions to the requirement to file a record of survey are identified at Section 8765 of the PLSA.

The map size, content and required statements are identified at Sections 8763, 8764, and 8764.5 of the PLSA. No other statements may appear on the face of the map except those required or authorized by the PLSA.

A record of survey shall be filed with the county surveyor within ninety (90) days after the completion of the survey or the setting of boundary monuments. The professional land surveyor or registered civil engineer shall notify the county surveyor by letter if reasons beyond the surveyor's control will prevent filing within the ninety- (90) daytime limit. The letter shall include the reason for delay, and estimate of the date of filing, and the assessor's parcel number.

The professional land surveyor or registered civil engineer shall provide information requested by the county surveyor without unreasonable delay when others are performing other surveys in the same location.

SECTION 7: RECORDS OF SURVEY/CORNER RECORDS

A professional land surveyor or registered civil engineer shall resubmit a record of survey previously examined by the county surveyor within sixty (60) days, or within the time mutually agreed upon by the professional land surveyor and county surveyor, to the county surveyor. The record of survey must address the items contained in the written statement by the county surveyor that accompanied the examined map noting the changes necessary to make the map conform to the requirements of Section 8766. The professional land surveyor and county surveyor shall attempt to reach agreement regarding the language for the explanation of the differences. Notations by the professional land surveyor and county surveyor shall be added to the record of survey to explain any differences of opinion and shall be sufficiently specific to identify the factual basis of the difference. A county surveyor shall file a resubmitted record of survey when a professional land surveyor or registered civil engineer requests filing without further change.

Subsequent to the filing of a record of survey, amended record of survey, or certificate of correction, the professional land surveyor who prepared the document shall transmit a copy of the document, including all recording information, to the county surveyor for indexing purposes.

The Board, within its power to administer the PLSA, may establish regulations for the preparation, review, and filing of records of survey.

(Cal. Code Regs. § 465, Bus. & Prof. Code § 8710, 8762, 8762.5, 8768, 8774.5)

SECTION 7: RECORDS OF SURVEY/CORNER RECORDS

CORNER RECORDS

When a corner established by the survey of the public lands of the United States is used, the professional land surveyor shall file a corner record with the County Surveyor in the county where the corner is located. When a record is to be filed, the professional land surveyor shall reconstruct or rehabilitate the monument and accessories to a reasonably permanent physical condition.

A corner record is not required when a record of survey, parcel or final map including proper notations relative to the corner will be filed or the corner is found as described on an existing "corner record." A lost corner shall be reestablished and shown on a record of survey.

Any person authorized to practice land surveying may file a corner record for any other corner or reference point to a property corner if a record of survey is not required to be filed.

The Board has established the corner record form to be used and set the time limits within which the form shall be filed.
